Create Community Solutions

The community needs your help! Consider each issue, then suggest plant-based solutions. Explain your choices on a separate sheet.

<tbody>
<tr>
<td>“The sidewalk and road outside my school is noisy, dusty, and hot. I can’t even hear myself think.”</td>
<td>“My neighborhood looks abandoned, with nothing but weed-filled lots and broken concrete sidewalks.”</td>
<td>“On our farm, we’re losing topsoil to wind and water erosion. Our crops need the nutrients in that soil to flourish and grow.”</td>
<td>“In our city, it’s easy to buy a box of cereal or a can of soup. But our local market doesn’t carry fresh fruit or vegetables.”</td>
<td>“After a heavy rain, my basement floods, and all my neighbors have the same problem.”</td>
</tr>
</tbody>
</table>

Choose one or more plant-based solutions:

a) **URBAN GARDENING** Grow fresh and nutritious fruits and vegetables locally in urban centers using sustainable practices.
b) **NEW PLANTING** Plant a variety of diverse trees, shrubs, and flowers to break up sprawling lawns, provide windbreaks, and increase biodiversity.
c) **MEDIAN PLANTING** Add shrubs, grasses, small trees, and flowers to medians on the roadways to diminish traffic sounds as well as pollution.
d) **GREENHOUSE GARDENING** Extend the growing season for fruits and vegetables by growing in greenhouses and other climate-controlled environments (such as hydroponics).
e) **RAIN GARDEN PLANTING** Plant shrubs, trees, and grasses to absorb rain and slow down soil runoff. Rain gardens are great for reducing flooding and erosion.
f) **TREE PLANTING** Plant trees. Their canopies block wind, slow heavy rain, provide habitat and shelter for wildlife, and offer shade. Their roots protect against erosion. Trees improve air quality and reduce noise pollution.

**RESEARCH YOUR REGION!** Choose a plant that grows well in your region and find out which climate and growing conditions it prefers. How could your plant create a solution in your community, school, or home?
