### Booktalk!

The earth is shaking in New York City – is it earthquakes? Turns out, it is due to a peculiar man, Nikola Tesla, testing his scientific theories.

Maude Taylor's five daughters, Mimi, Jane, Amelie, Emma, and Blythe, were once saved by Tesla, and their lives became intertwined over the years. When the women are called to Spirit Vale, New York, so Maude can answer her true calling as a spiritualist, Mimi's true identity is revealed when a mysterious couple visits.

With this knowledge, Mimi decides to begin a new life and follows Jane to New York City, where Jane will research information for an article on Tesla. Mimi finds work with some wealthy people and joins them as they leave for Europe. Shocked, Jane returns home to tell her family.

Maude and the other girls soon travel to England to attend a spiritualist conference, where they discover Mimi with her employer and fiancé. When the women find themselves aboard the *Titanic* on their return to the U.S., along with Tesla and many famous people, one question is on everyone's mind: will Tesla's latest invention save them or doom them?

Best for grades 6 and up
