Fly Guy Presents: Sharks

by Tedd Arnold

Booktalk!

Let's go on a field trip to the aquarium with Fly Guy and his pet boy, Buzz. Visiting the sharks is going to be exciting! There's nothing to be afraid of, right?

Over the last 400 million years, scientists have discovered 400 different kinds of sharks. You've heard of the Great White, but Buzz and Fly Guy have more to share. They especially want you to know about the shark's skeleton and teeth. Do you know how many teeth a shark's mouth can hold? Or what they like to eat? This is going to be one great field trip!

Best for ages 6–8
