The Hypnotists #1

by Gordon Korman

Booktalk!

There's a lot Jackson Opus has been able to do that he can't quite explain. Girls love him, though he's not particularly suave. He's the star of the debate team, though his arguments are lacking. When a special school for hypnotists recruits him, he should hardly be surprised – he knows he has some natural persuasive power.

It's just that the news they tell him would be shocking to anyone: at 12 years old, he may be the most powerful hypnotist of all time. Which leaves him with two choices: change his life, or change the world.

Best for ages 10–14
