Wings of Fire: The Dragonet Prophecy

by Tui T. Sutherland

Booktalk!

The dragonets have always been controlled by a higher power. They were stolen from their parents as eggs and brought together for training. They've learned the history lessons. They've learned to fight. All because a prophecy says they are the chosen five. This is the way it was fated to be.

But the dragonets are still young. They're tired of being used to fight someone else's battle. Together, there's a chance they can escape. But can they alter a destiny that was written before they were born?

Best for ages 8–12
