How to Speak Dolphin
by Ginny Rorby

Lily knows better than to think her half-brother, Adam, will ever be cured of his autism. Autism means that his brain processes things differently than most people’s brains. Yet when her stepfather suggests dolphin therapy, she knows it will at least make Adam happy, and she thinks that might be enough.

Her new best friend is quick to point out, however, that being kept in captivity away from her family isn’t making the dolphin, Nori, very happy at all. Is helping Adam an excuse for stealing Nori’s freedom?

Best for Grades 4-8
