Twintuition: Double Vision
by Tia & Tamera Mowry

Booktalk!

Moving to the middle of nowhere was the beginning of trouble for identical twins Cassie and Caitlyn. Leaving cool San Antonio and starting over, again, wasn’t part of their plan. But mom’s new job landed them here. Having each other always made new beginnings tolerable, but the sixth-grade sisters suddenly had very little in common except their unexplainable double vision, where they could see two versions of the same person or situation. First the bright colors, then the fading into the background. Would that help or hurt them in their new middle school?

Best for grades 4-6
