### Booktalk!

What if one morning you woke up and discovered that overnight, a dinosaur's body part had taken the place of one of your own? What if it was your teeth? Toes? Neck? And instead you had a tail with spikes, claws or horns! And what if those dinosaur parts helped you do really cool stuff, like win every food-eating contest or become a windsurfer? One thing's for sure. If you had T. rex teeth, you would never need a knife to cut up your food. Even though that might be fun, you are perfect just the way you are!
