SOLVE THE MYSTERY!

Kit knows that making good observations is important when solving a mystery. When you see a list of evidence, you need to draw a conclusion that explains the story. Practice your observation skills by solving the following mystery.

Abigail Breslin in
KIT KITTREDGE:
An American Girl

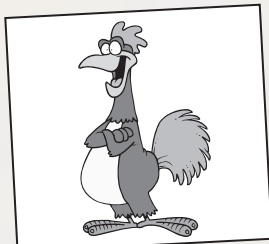

THE CRIME: A statue of Burger Man has been stolen from in front of the Burger Man restaurant.

The Prime Suspects:

three local high school kids

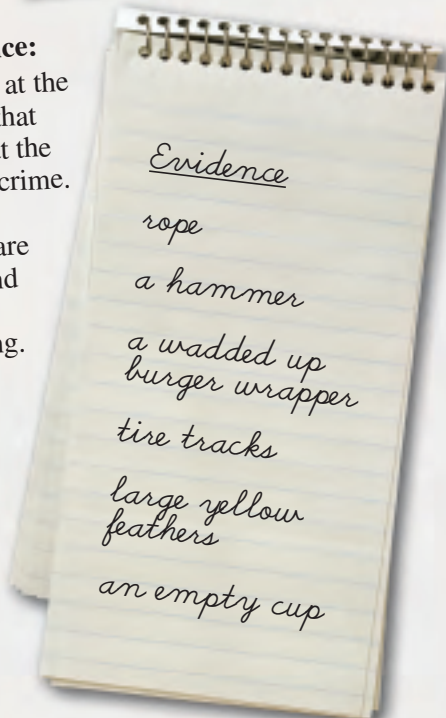

the Big Chicken mascot from the restaurant next door

Eyewitness Statement:

Edna Delberg was sitting at a traffic light across the street from the restaurant. She reported the following to the police: "I was sitting in my car and these three young kids came racing by in a red truck. They pulled into the Burger Man parking lot and drove over the grass, right near the statue. They left after that, but I'm sure they came back to steal that statue."

List of Evidence:

Look closely at the list of items that were found at the scene of the crime. Think about which ones are important and which ones mean nothing.

Review the prime suspects, eyewitness statement, and list of evidence and think about each clue carefully. Then answer the questions below to help you solve the mystery.

1. Who do you think stole the Burger Man statue?
2. What clues/evidence did you use to reach this conclusion?
3. What clues do you think are not important? Explain why.
4. What do you think is the most important piece of evidence?
