Fire Safety Speech

October 9, 2008

Dear Fellow Americans,

I am going to teach you fire safety. I believe fire safety should matter because it helps keep you safe. People might disagree with me. I think that if I showed them a house that had been burned down they would change their minds. Everyone should learn how to stop, drop, and roll. All families should have an escape plan in case their house catches on fire. Make sure to check your batteries in your smoke detectors twice a year. It could save your life!

Sincerely,

Lexie
