

Untangling the Marine Food Web

Directions: A healthy marine environment supports a large food web, which includes many plants and animals. See if you can unscramble the words below and number them in the proper order of their food chain (1-6, with 1 being the top of the chain).

Main source of energy for life on earth:	NSU	
Animal with fins and gills:	HIFS	
Small crustacean:	MIPSRH	
Ocean mammal:	HOLIDNP	
Tiny Animals that drift through oceans:	NOZALOPKOTN	
Tiny plant-like creatures that get their energy from the sun:	TKTOYPPANLNOH	

Now, see if you can unscramble the shaded letters from the words above to spell a hidden word.

Wild dolphins are top predators should not beg for food from _____.
