Teach essential math concepts and skills with children’s Literature.

You’ve always known literature opens new worlds. . . . Now use stories to open the world of mathematics.

The Marilyn Burns Classroom Math Library builds essential math concepts and skills while providing teachers the necessary instructional support to effectively teach math.

Created for Kindergarten through Grade 6, every library features award-winning, classic, and contemporary titles that captivate and motivate children while serving as springboards for math instruction.

A detailed lesson plan for each title addresses grade level appropriate math topics that are at the core of any curriculum. Each lesson strengthens instructional strategies used to teach math and reinforces critical thinking, computation, number sense, and problem-solving skills.

Each Grade Level Library:
- Includes a 45 book collection of 25 titles featuring 5 copies of 5 select titles.
- Contains a Teacher Handbook that explains how to use each book as the basis of a math lesson.

One of today’s most highly respected mathematics educators, Marilyn Burns is the creator and founder of Math Solutions Professional Development—dedicated to the improvement of math instruction in Grades K–8.
