

# Sound Off!

In this activity, your partner is going to walk you through a listening activity. Listen carefully as he or she makes different sounds and asks you questions about what you hear. You might be surprised by the results.

	Describe the sound.	Is it near or far?	What direction is the sound coming from?	How loud is it?

## Now Hear This!

Elephants can make and hear sounds that are too low for humans to hear. Dogs, mice, bats, and some monkeys can all hear sounds that are too high for the human ear to detect.
