How-to

Maximize Skype in the classroom

Skype in the Classroom is a perfect teacher portal to global connections. Here teachers can locate guest speakers such as computer scientists, children’s authors, animal conservationists, national park rangers, children’s yoga instructors and museum curators who are all willing to share their knowledge with students at no cost. For the Mystery Skype fans, an interactive map is available, allowing users to locate other Mystery Skype educators. Teachers can post an original project as a lesson to recruit partner classrooms.
