## Directions:

*Make a pledge to help Knock Pneumonia Off the Map by filling out the blanks on the hand. Then cut out the hand and decorate or embellish it any way you wish. Return the hand to your teacher.*

## Parents and Students:

Using what you have learned about pneumonia, fill out the blanks on the hand shape. Decorate the hand any way you wish, and then return it to your teacher. Teachers who visit [www.scholastic.com/savethechildren](http://www.scholastic.com/savethechildren) and click on "Put Your Classroom on the Map!" will become part of our interactive map experience, where your child's class will be featured as part of the nationwide effort to bring many hundreds of hands together to help make a difference in children's lives.

## What Can I Do?

► **Make Your Holiday Shopping Count:** Are you a class parent? Students can contribute to a year-end teacher gift that can provide the tools a community health worker needs to diagnose and treat a child with pneumonia. Visit [www.savethechildren.org/gifts](http://www.savethechildren.org/gifts) to explore the range of gift options.

► **Make the \$8 Wait:** Make a list of weekly purchases that cost more than \$8, such as a week of coffee, a movie ticket, or a new T-shirt. Pledge to give up just one of these items next week. For only \$8, a community health worker in a developing country can diagnose and treat a child. Contribute the money you saved by visiting [www.savethechildren.org/surviveto5](http://www.savethechildren.org/surviveto5).

► **Share a Video and Spread the Word:** Visit [www.scholastic.com/savethechildren](http://www.scholastic.com/savethechildren) to watch an educational video about pneumonia with your child. Then make a pledge to share the video with at least five friends via e-mail, social networking, or by word of mouth. Ask them each to share the video with five friends, and watch the news spread.
