

ASA
AMERICAN SPY ACADEMY

Welcome to **SPY ACADEMY**

So you want to be a spy.
You want the adventure and
excitement — and the cool gadgets.

We'll be honest with you. Being a real spy isn't just about acting like James Bond. It's about being observant, knowing how to see without being seen, making and breaking codes, communicating with other spies, using disguises, and—most important—keeping secrets.

This ASA course will teach you tricks of the spy trade, including codes and ciphers that spies use to keep their messages secret.

You will need to master these basic spy skills, in order to make it in the field, and be able to unravel the challenges you come across on your mission.

We are confident you will succeed. And remember: Andrew and Evie are counting on you.
