

**Workshop 3****Use the Library**

Look over the Library Resources. Then, tell which resources you would use to find the information item listed.

Ask a librarian to explain how to use any new resource for the first time.

**Library Resources**

- Online Catalogs** are for looking up resources by title, author, or subject. A library's book, audio, and video collections are listed in its online catalog.
- Shelves or Stacks** are where a library's books are kept.
- Vertical Files** hold pictures, maps, photographs, brochures, and pamphlets.
- Periodicals** are newspapers and magazines. Older issues may be found in an online database.
- Networked Computers** provide connections to the Internet, and online and CD-ROM databases.
- Reference Shelves** contain books such as encyclopedias, atlases, dictionaries, and almanacs.
- Audio/Visual Resources** include CDs, videos, and DVDs.
