

A Class Reacts

Now that your class has chosen a community issue to which they would like to respond, consider how your class should react. Use this worksheet to develop an idea.

1. What can your class do to respond to this community issue or problem?

2. Why do you think that this idea would be successful?

3. What steps would the class need to take to make the idea a reality?

4. What resources or help would the class need?
