## RESOURCE #2: Main Ideas

Cut out the cards and mix them up. Then match each detail with the correct main idea.

<b>Main Idea</b> Planets and stars are very different.	<b>Main Idea</b> Vy Canis Majoris is the largest star, not the Sun.
<b>Detail</b> Stars are much larger than planets.	<b>Detail</b> The sun only looks big because it's so close to us.
<b>Main Idea</b> The solar system includes the sun, eight planets, moons, comets, asteroids, and dwarf planets.	<b>Main Idea</b> All planets are made of rock and metal, but some are also gas and liquid.
<b>Detail</b> The eight planets revolve in paths around the Sun.	<b>Detail</b> Mercury, Venus, Earth, and Mars are made of rock and metal.
