

# MATILDA'S TOOLBOX

Matilda's protractor and glossary can help you stay calm under pressure. Cut them out and keep them handy as you explore the Angry Angles lessons!

## MATH GLOSSARY

**Length:** the distance between two points.

**Angle:** the amount of separation between two rays (lines) that meet at a common end point.

**Acute angle:** an angle measuring greater than 0 degrees and less than 90 degrees.

**Obtuse angle:** an angle measuring greater than 90 degrees and less than 180 degrees.

**Right angle:** an angle measuring exactly 90 degrees.

**Straight angle:** an angle measuring exactly 180 degrees (also known as a straight line).
