

We Need Healthy Lunches!

Dear Principal Samples,

we want to do well in school, so we need to fill our bodies with healthy foods. But we go to the cafeteria, and we are served greasy slices of pizza, salty French fries with too much ketchup, and canned fruit that tastes like it's been on the shelf for a long, long time. That's not cool! Can we have some healthier things for lunch, like crunchy carrots, fresh fruit, and baked chicken? The food will taste good—and we will all be healthier.

Your friends,

Mr. Bruce's class

The Seasons

There are four seasons in a year. The orbit of Earth around the sun causes the seasons. My favorite season is autumn! All of the seasons affect our life on Earth. In the spring, buds bloom on trees and baby animals are born. In many places, summer is very hot! And the fall is the time we harvest our crops. In some places, winter is very cold and a blanket of snow covers the ground. Animals like bears hibernate in the winter, taking a long sleep. Some birds migrate, which means they fly away to warmer places for the winter.

Read Books

Dear Mrs. Hoyt,

Thank you for everything.
I loved the way you did
things also I liked the web
of understanding it was cool. I had
fun with everything. I hope you
have a good trip Home to Oregon.

Love,

Kala

Read books.

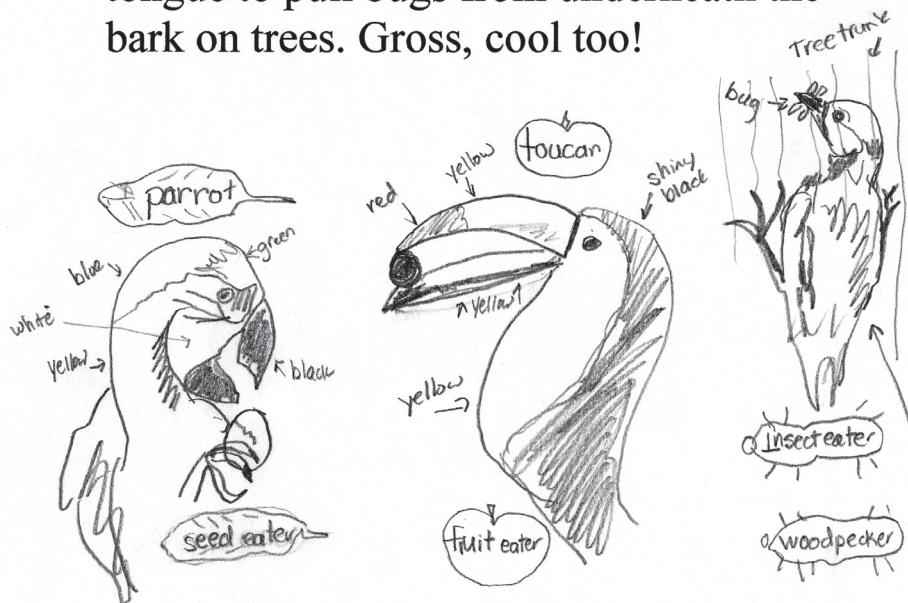

Sojourner Truth

Sojourner Truth was born in New York in 1797. She had a very large family—at least ten brothers and sisters! She didn't love her brothers and sisters very well, though. She was a slave, and slave owners would sell family members, which was very sad. When she was older, she was freed. She spent the rest of her life working to help other slaves be free. She cared about women's rights, too. Sojourner once said, "Truth is powerful and it prevails."

“Birds Eat”

by Tommy T.

Seeds. Fruit. Insects. Birds eat all of these foods. Parrots use powerful beaks to crack open nuts and seeds. A toucan's giant, colorful bill picks fruits and berries from tree branches. Almost all birds eat insects, but woodpeckers really know how to catch bugs. They use a long tongue to pull bugs from underneath the bark on trees. Gross, cool too!

Bus Rides

by J.D.

I ride on a skool bus just like every body els. It seems to take for ever. I hav to get up by 6:30 to catch the bus by 7. Win its rainy and cold, the frist bus step can be xtreemly slippery. Since my little sister and me are the frist on the bus we get to sit on the bak seat. Its like a xtra long bench. She sits by one windo and I sit by the other. We look out the windo and wach cars zip by. Then we do the same thing on the way home. Its sort ov boring but its better then waking.
