# Shark on the Hunt

A seal swims on the water's surface. A great white shark swims up and bursts out of the sea so fast, the seal doesn't see it. Flop. The shark falls into the water with the seal in its mouth. Then the shark rips the seal into pieces and swallows them whole. Gulp. The shark doesn't eat again for weeks. Can you imagine waiting a month for lunch.

# All About Me

Name: Cameron

My favorite colors are bright red light blue, and orange.

My favorite pets are playful dogs, fluffy, kittens and slithery snakes.

The meal I like best is spaghetti with red sauce meatballs, and lots of cheese.

In my free time, I like reading. I like playing baseball and walking my dog.

# Fennec Foxes

The fennec fox is the worlds smallest fox. Fennec foxes live in the desert. Theyre nocturnal, which means they're active at night. The fur on the fox's body is thick to keep it warm at night.

# What Should We Do?

Every weekend we have the same conversation in my family. My mom asks us what we want to do.

"I like to play soccer," said my sister, "so we need to go somewhere to play."

My little brother said he would like to have a picnic.

Dad chimed in, "It's a great day for a bike ride!"

"I have an idea!" I exclaimed. "we can do all those things at the park. Let's go!

# Stay Safe on Your Bike

You are riding your bike along and then you hear it. SCREECH! A car had to stop suddenly so it wouldn't hit you. Why? Because you weren't paying attention. You were supposed to stop.

Sometimes, you can't avoid an accident. You might fall if you hit a rock or something in the street. OUCH! But it wouldn't hurt your head if you had your helmet on.

# A Balloon Ride

For my Mom's Birthday, dad decided to take us to do something very special. It was my mom's dream to ride a balloon. We were going to leave from a nearby city, Scottsdale. On the car ride over, I was a bit nervous. What would it feel like to fly like Birds high over the land? But when our pilot mr. Cole took us high up in the clouds . . . Wow! I wasn't afraid anymore.
