## Jungle Secrets Revealed

You are a zoologist. You've been hunting for new species of animals in the Amazon jungle all of your adult life. Recently, you discovered a \_\_\_\_\_ (fill in your choice of animal and name it). After considerable research, you realize no one has ever seen one of these before. You are spellbound by how its tongue looks and operates. Knowing your colleagues may be skeptical of your find, create a fact sheet that explains all that you have discovered about this animal and in particular, the tongue and how it is used. Be sure to draw a sketch, in color, of what this amazing creature looks like.
