**R.A.F.T.S. PROMPT**

You are Sunny, a local farmer who grows fruits, vegetables, and wheat. You've just met Casey, the new owner of the Apples to Ziti market. Casey's store carries everything from A to Z, and she is proud to sell fresh foods from your farm. While chatting, you realize that Casey doesn't know that not only do her apples come from your farm, but so does the ziti (and other noodles)! Compile a list on note cards of things that your wheat is processed into, so that next time you see Casey, you can show her just how many there are. Casey owns the Apples to Ziti market, but you truly supply everything they sell!

Role: Sunny, a local farmer

Audience: Casey, the new owner of a grocery market—and your customer

Format: Note cards

Topic: Details about the foods that are made from wheat

Strong Verb: *show*
