

# Place Value to Add and Subtract

Directions: Break apart the numbers to add and subtract. Think about adding ones and ones, tens and tens, etc. Remember to show your steps.

Ex:

$$\begin{array}{r} 78 \\ \wedge \\ 70+8 \\ (70+40) \end{array} + \begin{array}{r} 45 \\ \wedge \\ 40+5 \\ (8+5) \end{array}$$

Think:

$$\begin{array}{r} 110 \\ + \\ 13 \\ \hline \mathbf{123} \end{array}$$

$$36 + 59 =$$

$$75 + 42 =$$

$$86 - 31 =$$

$$57 - 24 =$$

$$325 + 546 =$$

$$483 + 512 =$$

$$876 - 243 =$$

$$693 - 175 =$$

# Place Value to Add and Subtract

Directions: Break apart the numbers to add and subtract. Think about adding ones and ones, tens and tens, etc. Remember to show your steps.

Answer Key:

$$36 + 59 = 95$$

$$75 + 42 = 117$$

$$86 - 31 = 55$$

$$57 - 24 = 33$$

$$325 + 546 = 871$$

$$483 + 512 = 995$$

$$876 - 243 = 633$$

$$693 - 175 = 518$$
