

KLUTZ® Weird Inventions

Nobody invents anything very cool without making a lot of hysterically wrong turns. If you're interested in releasing your inner nutcase (which often can be used as another word for inventor) here's a thought exercise we think will help: Come up with your own invention. Do not be afraid. Go for lots of ideas, ridiculous to practical, and then go back looking for a winner. When you've found one, draw us a sketch, and drop it in the mail to us! If it has that special blend of brilliance and silliness that we seem to like so much, we may share it on our social pages or include it in a future printing of our **Book of Inventions**.

Here are some ideas to get you started...

The Make-a-Mutt System

Welcome mat

Whoopie cushion

Whoopee mat

The Solve-a-Problem System

Vegetable horror

Empty plate photo

The cover-up

Our lawyer wants you to know: If your idea is really practical and will make you a million dollars, don't send it to us. Keep it and make your million. And then send us half since we were the ones who gave you the assignment. Any inventions that come to us go into a big public mix, so if you want them kept as your property or secret, please don't send them in since they won't be after you do. By mailing them in, you are giving us permission to share them on our social pages or reprint them in future editions of this book where everyone else will see them and probably make lots of money from them. Except not you. Thanks, by the way.
