Name: _____

Make-a-10-Mosaic

Directions: Draw one card from the pile and write the number in the first blank on the math sentence line. Then select that many squares of a single color of construction paper and glue them along the corresponding grid row. Then solve the math sentence to find how many more you would need to make 10. Write this number in your math sentence and complete the grid row by selecting a different color of squares and glue them in place.
