

HOMEWORK FOR \_\_\_\_\_ DUE: March 15th

Be the first kid on your block to catch a real live leprechaun!

Check Make a **Leprechaun Trap**

1. Gather together all kinds of scrap material to make the perfect leprechaun trap.

such as:

small boxes

yarn string

plastic spoons

bags

paper cups

pieces of wood

spools

hair rollers

cardboard

straw

anything shiny

tape

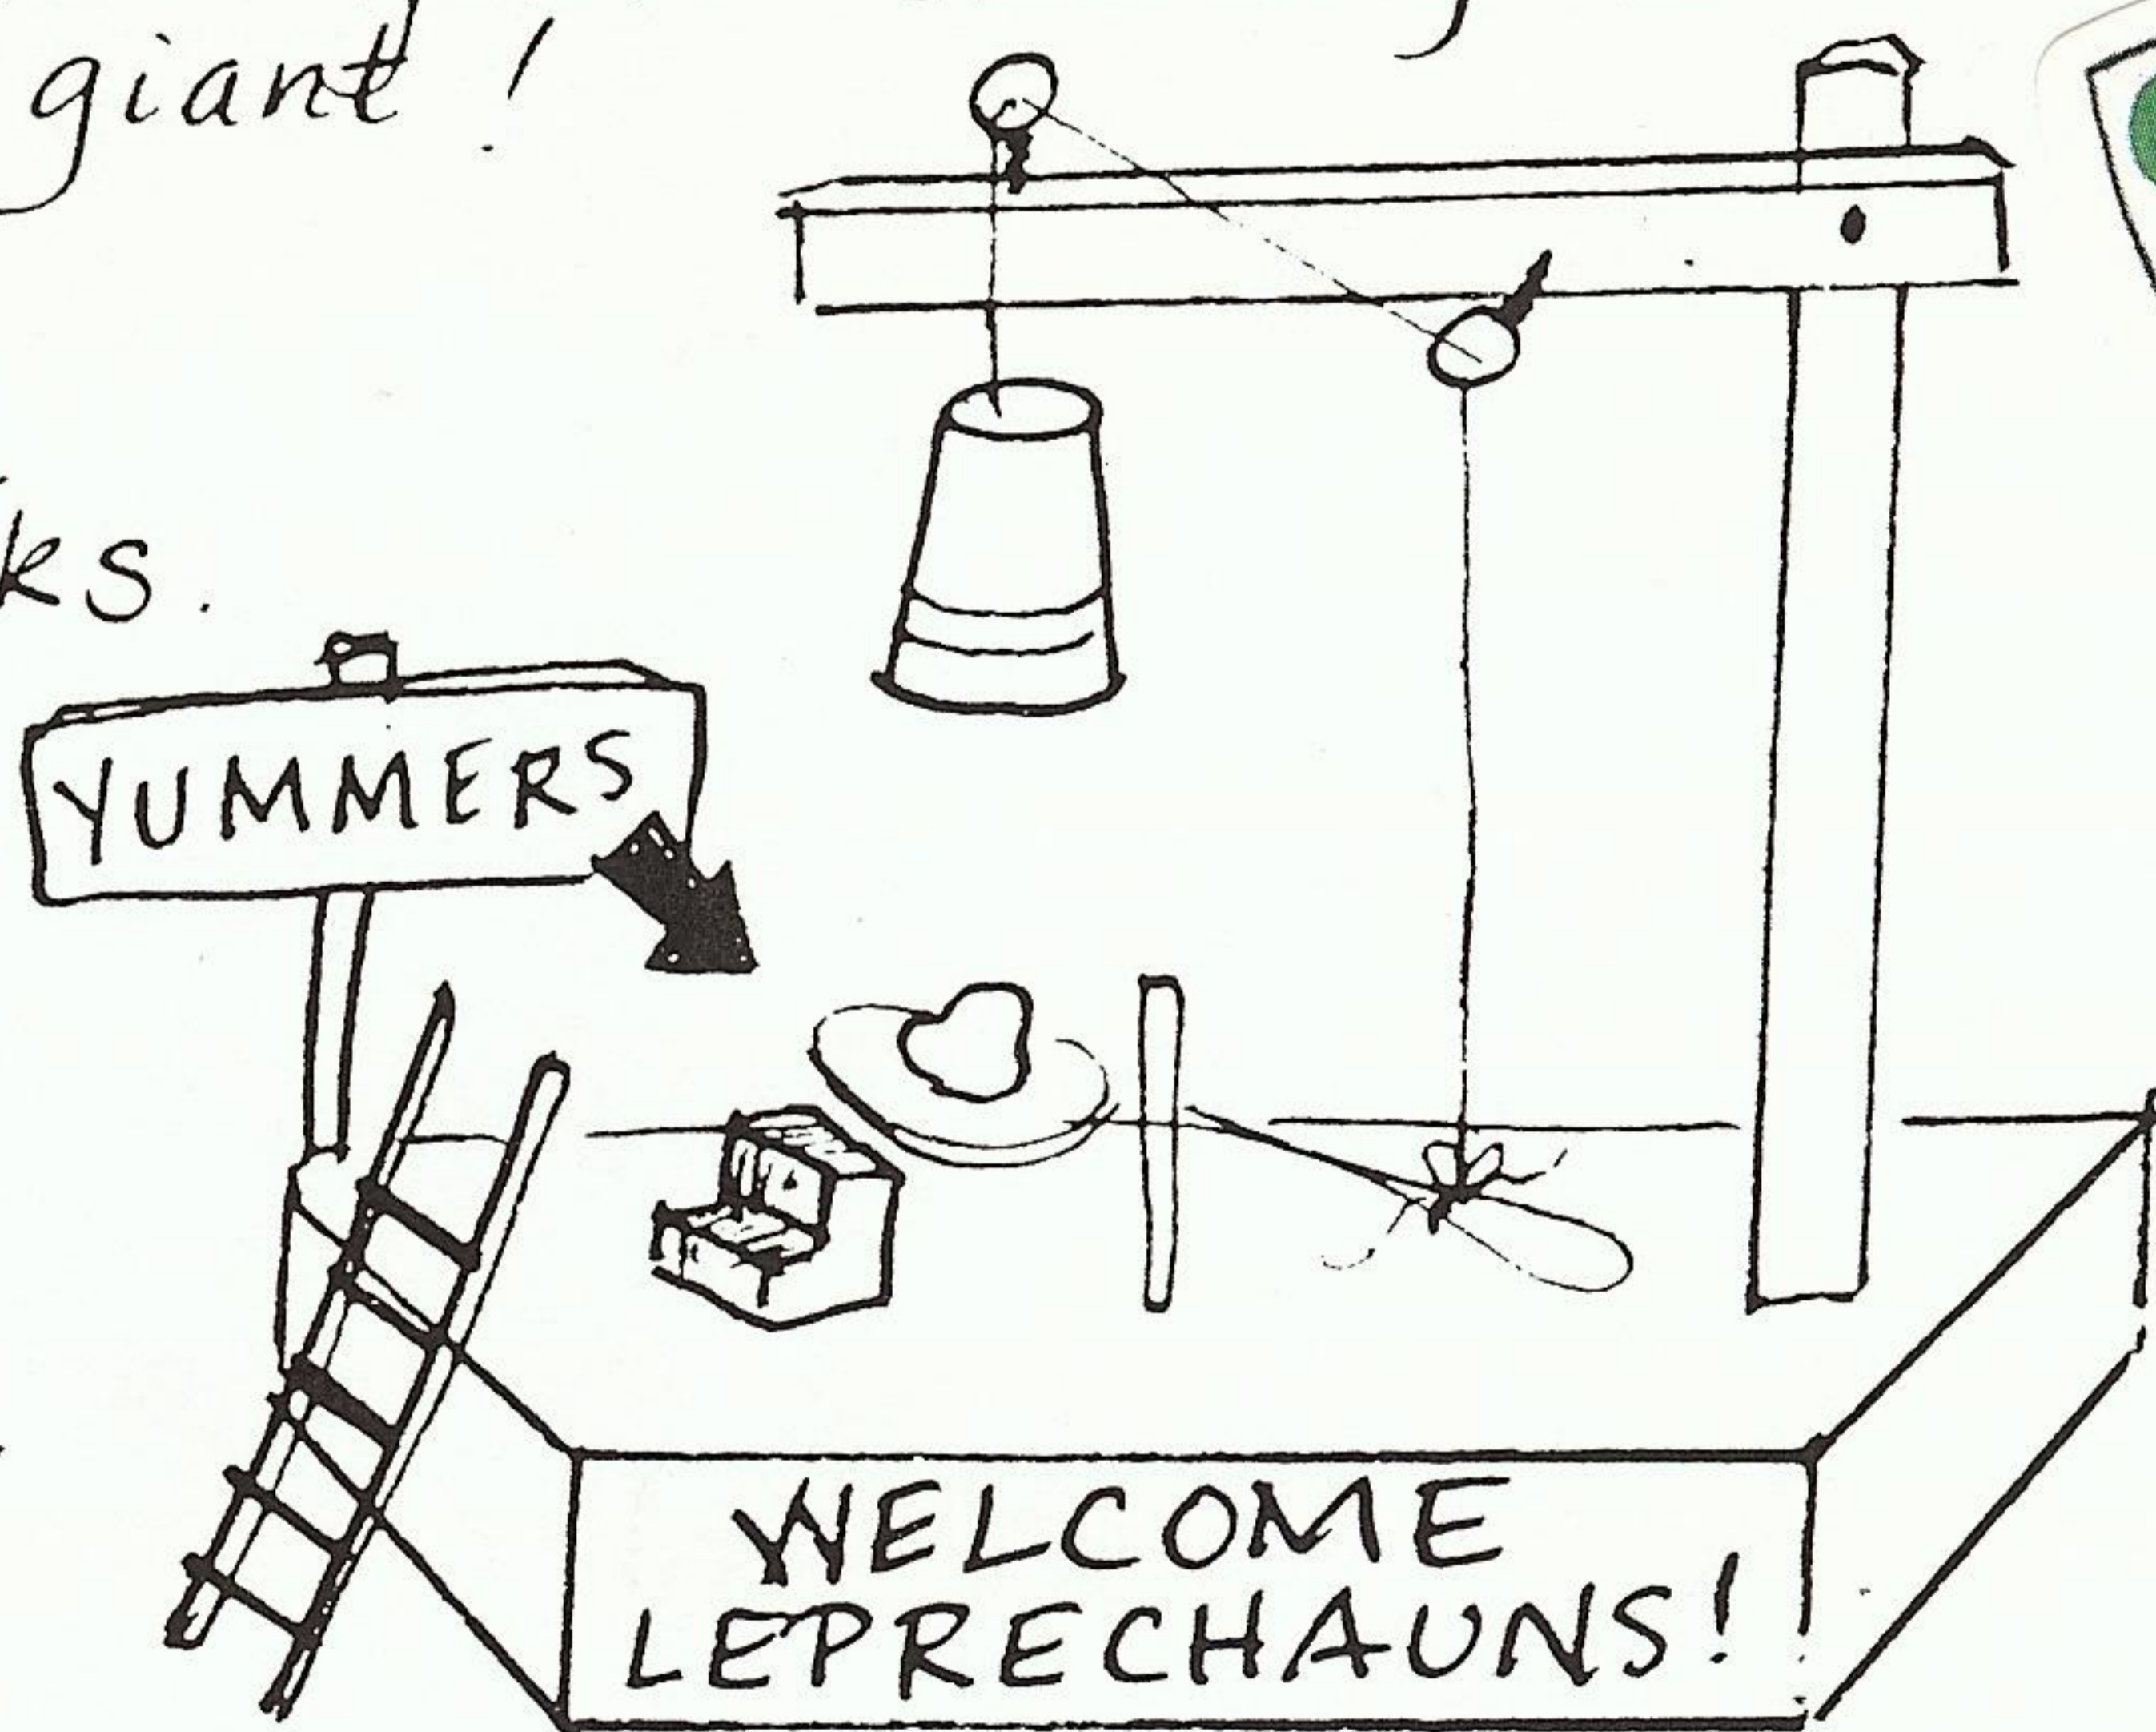

"sticky stuff"

2. Design the trap. Sketch out your plan. Decide how to attract a leprechaun and eventually catch him! Be clever, smart and tricky!

3. Build the trap. Use nails, glue or string to make your trap "leprechaun tight!" Don't make it too big - remember you're catching a leprechaun - not a giant!

4. Be ready to explain how your trap works. Use your trap to demonstrate.

5. Bring your trap to school on the due date printed above.

Hint: Leprechauns are tricky fellows - they like shiny things, things that glitter. They are also naughty and often disobey signs.

★ Parents: This can be a simple project. Hammer, nails, etc are not required. Have fun! Use your imagination!
