

# Celery Science: Design Your Own Experiment

**My Underlying Question—What I want to know:**

---

---

---

**What kind of experiment could you do to answer your question?**

---

---

---

---

---

---

---

## My Hypothesis

**When I** \_\_\_\_\_

**(what you will do), I think** \_\_\_\_\_

---

**What materials will you need?**

**What steps would you follow to set up your experiment? Write a numbered list of steps.**

---

---

---

---

**How will you collect your data? How often, what tools will you use (chart, table?)**

**How long will your experiment take? \_\_\_\_\_**
