

### How to create your cube:

- Cut out the shape on the solid lines.
- Fold the shape along the dotted lines.

# Create a Maker Cube

## Make an Animal

Using only the given materials, create a prototype of an animal that represents you.

## Make an Instrument

Using only the given materials, create an instrument that you like or would love to learn how to play.

## Make an Catapult

Using only the given materials, you and your partner work together to create a catapult that can shoot a penny to its furthest distance.

## Make a Bridge

Using only the given materials, create a bridge that connects you with your partner. Test your bridge to see how sturdy it is by placing given items on top of it.

## Make a Wearable

Using only the given materials, create something that you would wear that represents you.

## Make a Game

Using only the given materials, create a game that you and your partner can play.
