

Candy Corn in a Cup

Game 1	
Total Candy Corn: _____	
Hidden	Not Hidden

Game 2	
Total Candy Corn: _____	
Hidden	Not Hidden

Materials: 8-12 counters (candy corn) and a cup

Reason: Students learn adding on, counting up, and subtraction skills and general number combinations through repeated play.

How to Play

Record the number of total counters on the line. Player 1 hides some of the counters under the cup. Player 2 tells how many are hidden. Player 1 removes the cup. Players record how many counters were visible and how many were under the cup. Then players switch jobs and continue to play. The game is over when the grid is full.

Challenge: Use more counters. Use greater than and less than symbols between the numbers.
