

World Biomes

Biomes are regions of the world with similar climate, terrain, animals, and plants. There are both land and water biomes. Some resources list five main biomes: aquatic, forest, grassland, tundra, and desert. Other resources divided the grassland, desert, and aquatic biomes into different types.

Go to: <http://kids.nceas.ucsb.edu/biomes/index.html>

Read the information about biomes. Then select a biome for your project from the bottom of the page. Fill in the table using the biome information.
