

# Plants Grow Above and Below

**Above:** The stem grows up to the sunlight.

**Below:** The roots grow down into the soil.

**Above:** The stems grow leaves and flowers.

**Below:** Roots suck up water. Plants need water to live.

**Above:** A tree's stem is called a trunk.

**Below:** Its big, strong roots hold it in the ground.

**Above:** A bunny looks for tasty vegetables.

**Below:** A carrot is a root the bunny can eat! We eat carrots too.

## We Eat Plant Parts

We can eat different parts of plants. Which ones do you find delicious?

**stem**

**root**

**flower**

**leaves**

**fruit**

**seeds**
