Doggy Disco Counting Party

Determine the total number of friends at the party within each circle by adding the individuals on both sides of the addition sign. Find the matching sum at the bottom of the page and trace over the circle in that number's color. Remember helpful tricks such as touching each animal as you count or counting on from the higher number.

This Is How I Share

Solve the following three math number stories by drawing each situation in each box. Remember to show all of your work to explain how you got your answer! Make sure to write out the number sentence along with your drawing. CCSS.Math.Content.1.OA.A.1, CCSS.Math.Content.1.OA.A.2

 Groovy Joe and his friend get hungry from their dance party. They decide to order a pizza. *Knock! Knock!* The pizza delivery man is at the door and wants to join the party. How many friends are at the disco party now? Draw out the number story.

2. Groovy Joe and his four friends have been dancing for hours! Two of his friends get tired and decide to go home. How many friends are at the disco party now? Draw out the number story.

Groovy Joe is having his own disco party all alone! Suddenly, he hears knocking at the door. When Groovy Joe answers the door he finds his nine friends ready to rock! How many friends are at the disco party now? Draw out the number story.

Joe's Groovy Teaching Tips

Sharing Makes Me Feel...

Give each student a set of cards showing a variety of facial expressions happy, sad, angry, etc. Begin a discussion about the importance of sharing. Ask children to think about a time when someone shared (or didn't share) with them, as well as a time they shared (or didn't share) with someone else. Go around the room and encourage kids to hold up cards representing each emotional response.

Sharing and Keeping

Groovy Joe is very inclusive when inviting his friends to join him at his disco party. Turn and talk to a friend about when you can be inclusive to friends during the school day or at home.

Share and Tell

Instead of typical show-and-tell, invite students to create their own instruments made from objects that they can find in the classroom—like rubber bands, tissue boxes, erasers, water bottles, tin cans, etc.—that they can share with the class.

Use the reproducible activities in this guide to extend the fun!
