

Name _____

Date _____

Purpose:

Different animals have different adaptations which allow them to survive in their environment. Which "adaptation" do you think will help you collect the most food? A beak in the shape of a knife, spoon, or chopsticks.

Prediction:

Data:

	rice	pinto beans	lima beans
plastic knife			
plastic spoon			
chopsticks			

Results:

1. Which beak allowed you to pick up the most food? _____
2. Which food was the easiest to collect? _____
3. Which animal do you think would survive the longest in its environment: the one with the knife, spoon, or chopsticks for a beak? _____

What other animal adaptations can you think of?
