Consumers Make Choices

How much money do you have? \$ _____

As you preview the items at the store, make a list of the things you might like to buy. Include the quantity and the price.

Store Item	Quantity	Price

You probably won't be able to purchase everything you want today. Pick two items that you can afford separately, but are too expensive to buy together.

(For example, Tom has \$20. He wants to buy a stuffed animal for \$15 and a beach ball for \$11. He must decide between the two items.)

Evaluate your choices using the Decision Making Model below.

Problem:	
<i>I don't have enough money to buy both things I want.</i>	
Choice #1	Choice #2
Good Points	Good Points
Bad Points	Bad Points
Final Decision
