“Goo” Recipe

• Measure out 5 teaspoons of water into your cup. Add 2–4 drops of food coloring to the water.

• Add 1/4 level cup of cornstarch and swirl the cup to level the contents. Set the cup and contents aside for about a minute so it can settle. Begin cleaning up your area.

• Mix the ingredients with spoon to ensure an even consistency. Stir the mixture thoroughly to make sure there are no lumps.

• The “goo” should flow like a liquid when the cup is tipped but feel like a solid when touched with your finger. Add cornstarch, a small pinch at a time, if the mixture is too runny. Add water, 1/4 teaspoon at a time, if the mixture is too thick to flow. As the mixture sits out, it will dry out a bit, but can be reconstituted with water (add sparingly).

• Don’t dispose of the “goo” down the drain in any sink. It will clog up the drains.
