Have you ever received a letter or a card in the mail? There’s something special about getting a handwritten letter that was written just for you.

It’s great to send greeting cards for birthdays and holidays, but you don’t have to wait for a special occasion to send a letter. You can send a card or a letter anytime, for any reason you want! Maybe you’d like to congratulate someone, share a joke with a friend, or just let people know you are thinking about them.

Who are the special people in your life? Send them a message to let them know you care!

All the best,

Your name

P.S. If you forget to write something in the body of your letter, you can add it in a postscript! (*Postscript* actually means “written after.”)
