

Dear Mayor _____,

Global warming is real and it's here to stay — unless we do something to stop it. There's an amazing agreement that more than 400 of your fellow mayors have signed. It's called the U.S. Mayors Climate Protection Agreement. It's a 12-step program that sets reasonable goals for your city to reduce carbon dioxide emissions to below what the levels were in 1990. Please join these other mayors in being leaders in the fight to stop global warming.

The kids of the world are depending on you.

Sincerely,

_____, Age _____
