Earth Science											
S1E1. Students will observe, measure, and communicate weather data to see patterns in weather and climate.											
a. Identify different types of weather and the characteristics of each type.											
b. Investigate weather by observing, measuring with simple weather instruments (thermometer, wind vane, rain gauge), and recording weather data (temperature, precipitation, sky conditions, and weather events) in a periodic journal or on a calendar seasonally.											
c. Correlate weather data (temperature, precipitation, sky conditions, and weather events) to seasonal changes.
