

How Things Are Lining Up

INTRODUCTION

Now it's time to choose your own stock and start following it in the newspaper or online.

First, do some research on the web to find out about the company:

- What does this company do?
- What product does it manufacture, or what service does it perform?
- Where is it located, and how many people work there?

Fill in any information you can find in the Company Profile portion of the worksheet. Then fill in the movement of each day's shares by adding a point to the chart. When your two weeks are finished, draw a line connecting the dots. How did your stock do?

Choose your company wisely!

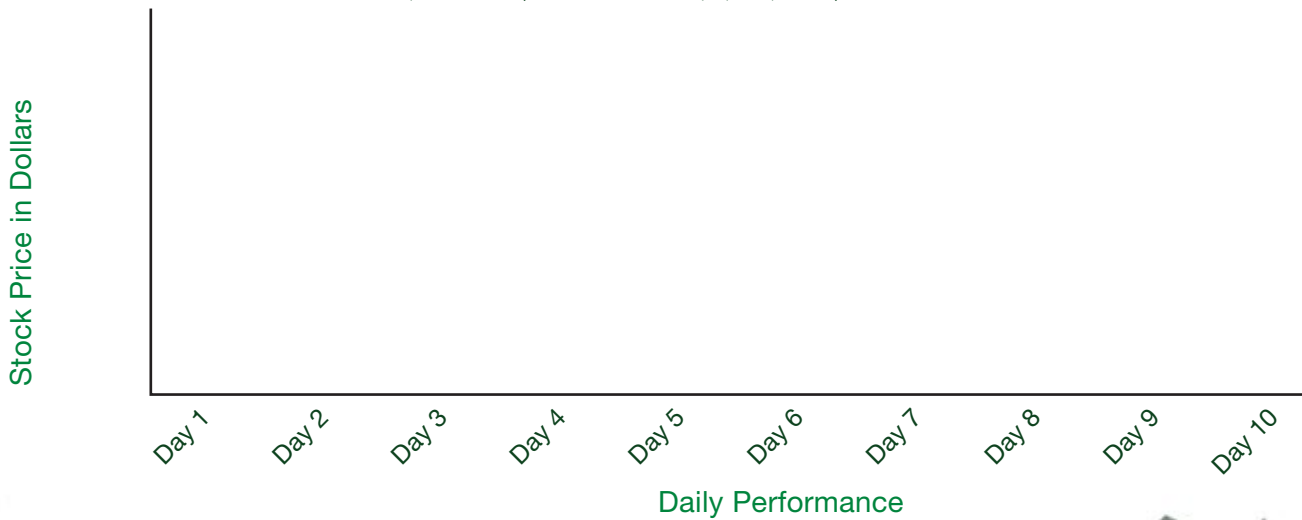

COMPANY NAME: _____

COMPANY PROFILE: _____

STOCK TICKER SYMBOL: _____

STOCK ANALYSIS CHART

Part II: Questions

(write your answers on the back of this paper)

1 On average, how much did the value of your stock change each day?

3 What is the difference in value of your stock on Day 6 compared to your stock's value on Day 1?

2 At close on Day 2, what was the percent change of your stock?

4 What is the primary difference between CDs and stocks that prevents you from creating a chart like this for CDs?
